

CS12012 – Web Development

Intake 43

Group Assignment

Submission Instructions

1. Each group must submit **one (01) compressed (.zip) file** through the LMS.
 - Rename the .zip file using **your Group ID** (e.g., 01.zip).
 - **Only one submission is allowed per group.**
 - **Only the Group Leader** is permitted to submit the assignment through the LMS.
2. The submitted .zip file must contain:
 - The complete source code of the project.
 - A comprehensive Project Report in PDF format.

Project Development Requirements

The project **must be developed using only the following technologies:**

- HTML
- CSS
- JavaScript
- PHP
- MySQL

Note:

- The use of frameworks, libraries, or technologies outside the above technology stack is **not permitted** unless explicitly approved by the lecturer in charge of the module.

Project Report Structure

Your PDF report should include the following sections.

1. Project Overview

- Brief introduction to the project.
- Problem statement and objectives.
- Description of the main system modules.
- Identification of the key stakeholders/users.
- Relevant system diagrams (if applicable).

2. Tools and Technologies

- Brief explanation of the technologies used.
- Description of how responsive web design has been implemented to support different screen sizes and devices.

3. Database Design

- Entity-Relationship (ER/EER) Diagram.
- Database schema/design.
- Screenshots of the implemented MySQL database.
- Description of the relationships between tables.

4. User Interfaces

- Screenshots of all major user interfaces.
- Brief explanation of the functionality of each interface.

5. Future Enhancements

- Proposed improvements to the current system.
- Additional features that could be implemented.
- Suggestions for commercialization, scalability, and future development.

Project Evaluation

The project assessment consists of the following components:

- **Project Submission:** Submission of the complete project (source code and report) through the LMS.
- **Project Viva:** Each group is required to attend a viva examination to demonstrate the functionality of the system and answer questions regarding the implementation, design decisions, database, and source code.

All group members are expected participate in the viva and should have a thorough understanding of the entire project.

- **Attendance at the Project Viva is compulsory for every group member.**
- **Any student who fails to attend the viva examination without an approved valid reason will be awarded zero (0) marks**
- **Every member is expected to have a thorough understanding of the entire project, regardless of their individual contribution.**

Group Information

- Group details and project topic allocations will be published separately.
- Group changes are **not permitted** after the groups have been finalized unless prior approval has been obtained from the lecturer in charge of the module.
- Every group must clearly state the details of all group members in the project report using the following format:

Index No.	Name	Degree Programme	Individual Contribution
-----------	------	------------------	-------------------------

Important Dates

- **Project Submission Deadline: Last week of the semester** (Exact date and time will be announced via the LMS.)
- **Project Viva: Last week of the semester** (The viva schedule will be published separately.)

Late submissions may be subject to penalties in accordance with the module assessment regulations.
